

Dear Colleagues

I am delighted to invite you to the SERAF "Satellite Workshop on Hemorrhoids Surgery"

The Goal of SERAF is to help lead our profession to excellence through the pursuit of: 1) advances in surgical practice; 2) standardization in surgical techniques; 3) the recruitment of future leaders in our field; and 4) perfection in our profession.

In this meeting, we will devote time to live surgery and hold a symposium on hemorrhoids surgery. We will share our expertise and our clinical experiences in both the basics and advanced surgical methods.

Experienced colorectal surgeons from around Korea will participate, joined by **Wanjin Shao**(Shanghai Longhua Hospital), **Yibin Pan**(Jiangsu Province Hospital of TCM), and **Gen Hidaka**(Hidaka Coloproctology Clinic).

We look forward to sharing our respective academic journeys and deepening our collegial relationship.

We suffered an unusually hot summer, but the fall promises to be fruitful and beautiful. I would be most grateful for your interest and participation.

Sung Hwan Hwang (Director, Busan Hangun Hospital / Busan Hangun Hospital Beomcheon Campus)
